
BOS

BOS Engineering Founded in 1999 by Oliver Bossard, BOS Engineering (<http://www.bos-engineering.com>) is an engineering company of the new century that prefers to promote themselves through results. As a chassis and suspension design and development specialist working in the domains of racing and production for cars, motor bikes and mountain bikes, it's area of special expertise includes research and development, original design of chassis and suspension, production engineering and optimisation of existing systems. BOS is able to work in any place at any time (racing support, tests….).With modern high performance tools (CAO, electronic dynamometer, data acquisition) and skilled staff passionately fond of high technology, BOS will always find the best solution in the shortest time possible.In addition to the close cooperation with Commencal, BOS Engineering has experience in many ‘performance suspension’ fields including:

- Vouilloz Racing Team (Mountain Bike Downhill World Cup Overall in 2000, World Championships 2001)
- World 250cc MX
- World 125cc MX
- Yamaha Factory MX
- Honda France MX
- Team Coquard Suzuki MX
- Team Suzuki Star Motos MX
- World Enduro Championships (Stephane Peter Hansel)
- Renault Sport (Touring car and rally)
- Peugeot WRC team
- French Touring Car Championships
- World Rallye Raid Championships (Mercedes M Class)
- FIA GT World Championships (Paul Belmond Racing)
